Paul Hsieh derivative license

The derivative content includes raw computer source code, ideas, opinions, and excerpts whose original source is covered under another license and transformations of such derivatives. Note that mere excerpts by themselves (with the exception of raw source code) are not considered derivative works under this license. Use and redistribution is limited to the following conditions:

One may not create a derivative work which, in any way, violates the Paul Hsieh exposition license described above on the original content.

One may not apply a license to a derivative work that precludes anyone else from using and redistributing derivative content.

One may not attribute any derivative content to authors not involved in the creation of the content, though an attribution to the author is not necessary.

SoftFloat (on Linux only)

Author: John R. Hauser

Legal Notice

SoftFloat was written by John R. Hauser. Release 2c of SoftFloat was made possible in part by the International Computer Science Institute, located at Suite 600, 1947 Center Street, Berkeley, California 94704. Funding was partially provided by the National Science Foundation under grant MIP-9311980. The original version of this code was written as part of a project to build a fixed-point vector processor in collaboration with the University of California at Berkeley, overseen by Profs. Nelson Morgan and John Wawrzynek.

THIS SOFTWARE IS DISTRIBUTED AS IS, FOR FREE. Although reasonable effort has been made to avoid it, THIS SOFTWARE MAY CONTAIN FAULTS THAT WILL AT TIMES RESULT IN INCORRECT BEHAVIOR. USE OF THIS SOFTWARE IS RESTRICTED TO

PERSONS AND ORGANIZATIONS WHO CAN AND WILL TOLERATE ALL LOSSES, COSTS, OR OTHER PROBLEMS THEY INCUR DUE TO THE SOFTWARE WITHOUT RECOMPENSE FROM JOHN HAUSER OR THE INTERNATIONAL COMPUTER SCIENCE INSTITUTE, AND WHO FURTHERMORE EFFECTIVELY INDEMNIFY JOHN HAUSER AND THE INTERNATIONAL COMPUTER SCIENCE INSTITUTE (possibly via similar legal notice) AGAINST ALL LOSSES, COSTS, OR OTHER PROBLEMS INCURRED BY THEIR CUSTOMERS AND CLIENTS DUE TO THE SOFTWARE, OR INCURRED BY ANYONE DUE TO A DERIVATIVE WORK THEY CREATE USING ANY PART OF THE SOFTWARE.

The following are expressly permitted, even for commercial purposes:

- (1) distribution of SoftFloat in whole or in part, as long as this and other legal notices remain and are prominent, and provided also that, for a partial distribution, prominent notice is given that it is a subset of the original; and
- (2) inclusion or use of SoftFloat in whole or in part in a derivative work, provided that the use restrictions above are met and the minimal documentation requirements stated in the source code are satisfied.

UPX (on Windows only)
Copyright (c) 1996-2018 Markus Oberhumer, Laszlo Molnar & John Reiser

Notice:
PLEASE CAREFULLY READ THIS LICENSE AGREEMENT, ESPECIALLY IF YOU PLAN TO MODIFY THE UPX SOURCE CODE OR USE A MODIFIED UPX VERSION.

ABSTRACT =====

UPX and UCL are copyrighted software distributed under the terms of the GNU General Public License (hereinafter the "GPL").

The stub which is imbedded in each UPX compressed program is part of UPX and UCL, and contains code that is under our copyright. The terms of the GNU General Public License still apply as compressing a program is a special form of linking with our stub.

As a special exception we grant the free usage of UPX for all executables, including commercial programs.
See below for details and restrictions.

COPYRIGHT =====

UPX and UCL are copyrighted software. All rights remain with the authors.

UPX is Copyright (C) 1996-2000 Markus Franz Xaver Johannes Oberhumer
UPX is Copyright (C) 1996-2000 Laszlo Molnar

UCL is Copyright (C) 1996-2000 Markus Franz Xaver Johannes Oberhumer

GNU GENERAL PUBLIC LICENSE =====

UPX and the UCL library are free software; you can redistribute them and/or modify them under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

UPX and UCL are distributed in the hope that they will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License

along with this program; see the file COPYING.

SPECIAL EXCEPTION FOR COMPRESSED EXECUTABLES

=====

The stub which is imbedded in each UPX compressed program is part of UPX and UCL, and contains code that is under our copyright. The terms of the GNU General Public License still apply as compressing a program is a special form of linking with our stub.

Hereby Markus F.X.J. Oberhumer and Laszlo Molnar grant you special permission to freely use and distribute all UPX compressed programs (including commercial ones), subject to the following restrictions:

1. You must compress your program with a completely unmodified UPX version; either with our precompiled version, or (at your option) with a self compiled version of the unmodified UPX sources as distributed by us.
2. This also implies that the UPX stub must be completely unmodified, i.e. the stub imbedded in your compressed program must be byte-identical to the stub that is produced by the official unmodified UPX version.
3. The decompressor and any other code from the stub must exclusively get used by the unmodified UPX stub for decompressing your program at program startup. No portion of the stub may get read, copied, called or otherwise get used or accessed by your program.

ANNOTATIONS

=====

- You can use a modified UPX version or modified UPX stub only for programs that are compatible with the GNU General Public License.
- We grant you special permission to freely use and distribute all UPX compressed programs. But any modification of the UPX stub (such as, but not limited to, removing our copyright string or making your program non-decompressible) will immediately revoke your right to use and distribute a UPX compressed program.
- UPX is not a software protection tool; by requiring that you use the unmodified UPX version for your proprietary programs we make sure that any user can decompress your program. This protects both you and your users as nobody can hide malicious code - any program that cannot be decompressed is highly suspicious by definition.
- You can integrate all or part of UPX and UCL into projects that are compatible with the GNU GPL, but obviously you cannot grant any special exceptions beyond the GPL for our code in your project.
- We want to actively support manufacturers of virus scanners and similar security software. Please contact us if you would like to incorporate parts of UPX or UCL into such a product.

The following software components are licensed under the terms and conditions of the "Public Domain (Public Domain)":

xz

Copyright Lasse Collin

Notice:

Different licenses apply to different files in this package. Here

6 is a rough summary of which licenses apply to which parts of this
7 package (but check the individual files to be sure!):

8

9 - liblzma is in the public domain.

10

11 - xz, xzdec, and lzmadec command line tools are in the public
12 domain unless GNU getopt_long had to be compiled and linked
13 in from the lib directory. The getopt_long code is under
14 GNU LGPLv2.1+.

15

16 - The scripts to grep, diff, and view compressed files have been
17 adapted from gzip. These scripts and their documentation are
18 under GNU GPLv2+.

19

20 - All the documentation in the doc directory and most of the
21 XZ Utils specific documentation files in other directories
22 are in the public domain.

23

24 - Translated messages are in the public domain.

25

26 - The build system contains public domain files, and files that
27 are under GNU GPLv2+ or GNU GPLv3+. None of these files end up
28 in the binaries being built.

29

30 - Test files and test code in the tests directory, and debugging
31 utilities in the debug directory are in the public domain.

32

33 - The extra directory may contain public domain files, and files
34 that are under various free software licenses.

35

36 You can do whatever you want with the files that have been put into
37 the public domain. If you find public domain legally problematic,
38 take the previous sentence as a license grant. If you still find
39 the lack of copyright legally problematic, you have too many
40 lawyers.

41

42 As usual, this software is provided "as is", without any warranty.

43

44 If you copy significant amounts of public domain code from XZ Utils
45 into your project, acknowledging this somewhere in your software is
46 polite (especially if it is proprietary, non-free software), but
47 naturally it is not legally required. Here is an example of a good
48 notice to put into "about box" or into documentation:

49

50 This software includes code from XZ Utils <<http://tukaani.org/xz/>>.

51

52 The following license texts are included in the following files:

53 - COPYING.LGPLv2.1: GNU Lesser General Public License version 2.1

54 - COPYING.GPLv2: GNU General Public License version 2

55 - COPYING.GPLv3: GNU General Public License version 3

56

57 Note that the toolchain (compiler, linker etc.) may add some code

58 pieces that are copyrighted. Thus, it is possible that e.g. liblzma
59 binary wouldn't actually be in the public domain in its entirety
60 even though it contains no copyrighted code from the XZ Utils source
61 package.
62
63 If you have questions, don't hesitate to ask the author(s) for more
64 information.

The following software components are licensed under the terms and conditions of the "BSD-3-Clause (BSD-3-Clause "New" or "Revised" License)":
nodejs
Copyright 2014, the V8 project authors. All rights reserved.

Notice:
This license applies to all parts of V8 that are not externally maintained libraries. The externally maintained libraries used by V8 are:

- PCRE test suite, located in test/mjsunit/third_party/regexp-pcre/regexp-pcre.js. This is based on the test suite from PCRE-7.3, which is copyrighted by the University of Cambridge and Google, Inc. The copyright notice and license are embedded in regexp-pcre.js.
- Layout tests, located in test/mjsunit/third_party/object-keys. These are based on layout tests from webkit.org which are copyrighted by Apple Computer, Inc. and released under a 3-clause BSD license.
- Strongtalk assembler, the basis of the files assembler-arm-inl.h, assembler-arm.cc, assembler-arm.h, assembler-ia32-inl.h, assembler-ia32.cc, assembler-ia32.h, assembler-x64-inl.h, assembler-x64.cc, assembler-x64.h, assembler-mips-inl.h, assembler-mips.cc, assembler-mips.h, assembler.cc and assembler.h. This code is copyrighted by Sun Microsystems Inc. and released under a 3-clause BSD license.
- Valgrind client API header, located at third_party/valgrind/valgrind.h. This is release under the BSD license.

These libraries have their own licenses; we recommend you read them, as their terms may differ from the terms below.

The following software components are licensed under the terms and conditions of the "BSD-3-Clause (BSD-3-Clause "New" or "Revised" License)":

copyright of some code, I'll correct it ASAP.

copyrights of artists. Moreover, I think that if audio-tracks are supported, it should be done through the VFS and not via `ioctl`s. A problem here could be the fact that audio-frames are 2352 bytes long, so either the audio-file-system should ask for 75264 bytes at once the least common multiple of 512 and 2352), or the drivers should bend their backs to cope with this incoherence (to which I would be opposed). Furthermore, it is very difficult for the hardware to find the exact frame boundaries, since there are no synchronization headers in audio frames. Once these issues are resolved, this code should be standardized in `\cdromc`.

Copyright (c) by Jaroslav Kysela <perex@perex.cz> Routines for control of 16-bit SoundBlaster cards and clones Note

This is very ugly hardware which uses one 8-bit DMA channel and second 16-bit DMA channel.

Unfortunately 8-bit DMA channel can't transfer 16-bit samples and 16-bit DMA channels can't transfer 8-bit samples. This make full duplex more complicated than can be... People, don't buy these soundcards for full 16-bit duplex!!! Note 16-bit wide is assigned to first direction which made request. With full duplex - playback is preferred with abstract layer.

Copyright (c) by David Shust, dshust@shustring.com. This chip has nonstandard and extended behaviour with regard to its S/PDIF output. The AC'97 spec states that the S/PDIF signal is to be output at pin 48. The YMF753 will output the S/PDIF signal to pin 43, 47 (EAPD), or 48. By default, no output pin is selected, and the S/PDIF signal is not output. There is also a bit to mute S/PDIF output in a vendor-specific register., Copyright (c) by Jaroslav Kysela <perex@perex.cz> Universal interface for Audio Codec '97

Copyright (C) by Paul Laufer 2002. Based on code originally by Hannu Savolainen which was modified by many
others over the years. Authors specifically mentioned in the previous version were Daniel Stone, Alessandro Zummo,
Jeff Garzik, Arnaldo Carvalho de Melo, Daniel Church, and myself.

Copyright */; Copyright (C) 1995,1996,1997,1998 Riccardo Facchetti (fizban@tin.it), Copyright (C) Riccardo Facchetti
1995-98\n"); if (io == -1 || dma == -1 || irq == -1) { printk(KERN_INFO "aedsp16 I/O, IRQ and DMA are
mandatory\n"); return -EINVAL;,, Copyright \n");,, Copyright string). This works with any SB and compatible. Added
the code to request_region at device init (should go in the main body of voxware). v0.4 (BETA) Better configure.c
patch for aedsp16 configuration (better logic of inclusion of AEDSP16 support) Modified the conditional compilation
to better support more than one sound card of the emulated type (read the NOTES above) Moved the sb init routine
from the attach to the very first probe in sb_card.c Rearrangements and cleanups Wiped out some unnecessary code
and variables this is kernel code so it is better save some TEXT and DATA Fixed the request_region code. We
must allocate the aedsp16 (sbpro) I/O ports in any case because they are used to access the DSP configuration
registers and we can not allow anyone to get them.

(c) 1995-1998 E.M. Serrat emserrat@geocities.com, (C) 1995-2003 Linux DECnet Project Team\n";, copyright preserved below. Steve Whitehouse Some bug fixes, cleaning up some code to make it compatible with my routing layer. Steve Whitehouse Merging changes from Eduardo Serrat and Patrick Caulfield. Steve Whitehouse Further bug fixes, checking module code still works with new routing layer. Steve Whitehouse Additional set/get_sockopt() calls. Steve Whitehouse Fixed TIOCINQ ioctl to be same as Eduardo's new code. Steve Whitehouse recvmsg() changed to try and behave in a POSIX like way. Didn't manage it entirely, but its better. Steve Whitehouse ditto for sendmsg(). Steve Whitehouse

Copyright 2000 by Hans Reiser, licensing governed by reiserfs/README

copyright 2000 by Hans Reiser, and the licensing of what follows is governed by reiserfs/README

copyright label on that code so the poor blight and his customers can keep things straight. All portions of governed files not labeled otherwise are owned by Hans Reiser, and by adding your code to it, widely distributing it to others or sending us a patch, and leaving the sentence in stating that licensing is governed by the statement in this file, you accept this. It will be a kindness if you identify whether Hans Reiser is allowed to license code labeled as owned by you on your behalf other than under the GPL, because he wants to know if it is okay to do so and put a check in the mail to you (for non-trivial improvements) when he makes his next sale. He makes no guarantees as to the amount if any, though he feels motivated to motivate contributors, and you can surely discuss this with him before or after contributing. You have the right to decline to allow him to license your code contribution other than under the GPL.
