

# FORD MILESTONES

Ford Motor Company is celebrating production of its 350 millionth vehicle. The milestone model, which rolled off the assembly line in Thailand on Aug. 31, 2012, is a new Ford Focus, the best-selling car in the world for the first half of 2012. If all 350 million vehicles built throughout Ford's 109-year history were laid end to end, they would stretch to the moon and back – twice.
