

Environmental Policy: Protecting Health and the Environment

Our Policy Letter on the environment makes clear that sustainable economic development is important to the future welfare of Ford and society in general. Protection of employee health and the environment are important considerations in the business decisions we make. Ford is committed to meeting regulatory requirements that apply to our businesses, at a minimum. As appropriate, we establish and comply with standards of our own, which may go beyond legal mandates. These factors are integral parts of the planning process. Our products, services, processes and facilities are planned and operated to incorporate objectives and targets and are periodically reviewed to minimize to the extent practical the creation of waste, pollution and any adverse impact on employee health or the environment. Protection of health and the environment is a Company-wide responsibility of employees at all levels.
